Addendum No. 1

Tender NGPA/T/2026/014 · Supply, Installation, Commissioning and Maintenance of High-Energy Cargo X-Ray Inspection Systems · Issued 28 October 2026

> This Addendum forms an integral part of the RFP. In accordance with RFP §2.5.2 and §2.6.1 it prevails over the RFP main document, Annex B and Annex C wherever they differ. Bidders shall acknowledge receipt in Form F-1.

Part A — Changes to the tender documents

A1 **Bid closing date** (cover page): replace "30 November 2026, 12:00" with **"14 December 2026, 12:00 local time"**. The bid validity of 120 days (RFP §2.2.1) is counted from the new closing date.

A2 **RFP §3.3.1 and Annex B TB-41** are replaced by: "The Bidder shall supply **20 workstations**: 10 at the CIAC, 5 at T1, 3 at T2 and 2 spare/mobile." The workstation specification in RFP §4.10.1 is unchanged.

A3 **RFP §4.5.2 and Annex B TB-22** are amended: UPS autonomy for **control systems and servers** shall be at least **60 minutes** at full load (previously 30). UPS autonomy for workstations remains 30 minutes (TB-23).

A4 **New clause RFP §4.3.4:** "The Bidder shall submit with its Technical Proposal a **Radiation Licensing Support Plan** (activities, documents, responsibilities, timeline aligned with §5.1) for obtaining the national regulator's licence for every system." MANDATORY

A5 **Annex B TB-07**, relocatable unit column: replace "≥ 150" with **"≥ 120"** trucks per hour. All other columns are unchanged.

Part B — Answers to clarification questions

#	Question (summarised)	Answer
Q1	Is the relocatable unit subject to the T1 penetration target when deployed at T1?	No. The relocatable unit's targets are those of the "Relocatable unit" column of Annex B wherever it is deployed (see also A5). All other requirements of the site where it is deployed apply.
Q2	If PAC is delayed by the Employer, when does the warranty start?	The warranty starts at PAC (RFP §6.1.1). If PAC is delayed by more than 60 days for reasons solely attributable to the Employer, the warranty starts on the 61st day after successful SAT.
Q3	Our licence requires a one-time activation. How should this be handled?	A one-time offline activation (licence file transferred by the Employer's staff) is acceptable, provided no connection outside the Employer's network is required afterwards for operation, licence renewal or updates (RFP §4.6.1).
Q4	Are guarantees from foreign banks acceptable?	Only if confirmed by a bank licensed in the State (bid security, advance payment guarantee and performance security).
