Technical proposal (Envelope 1)

Tender NGPA/T/2026/021 · Port Community System: Web Platform, Messaging Hub and Integration Services

To: The Chair, Tender Committee, Northern Gulf Ports Authority

Having examined the tender documents for NGPA/T/2026/021, we, Corniche Logistics IT S.A.E., submit our technical proposal for the Port Community System. This envelope contains no prices. We confirm that our bid is valid as stated in our financial proposal.

Tarek El-Sayed
Chief Executive Officer, Corniche Logistics IT S.A.E.

Date: 14 January 2027
Reference: CLIT/T/27/021

SAMPLE · FICTIONAL

1. Company and references

Corniche Logistics IT has built port and logistics software since 2006 and runs a branch office with 25 engineers in Al-Noor. Our product, CornichePort, is in use at four ports in Egypt and the Gulf.

Reference	Scope	Year
Damietta Port Community Portal	Portal and messaging, 2,100 users	2022
Sokhna Logistics Zone	Truck appointments, Android app	2024

2. Solution and architecture

CornichePort is installed in the Authority's data centres (primary and secondary site). All application, database, integration and monitoring components run on Authority infrastructure; licences are perpetual and do not require any connection outside the Authority's network.

The messaging hub handles UN/EDIFACT (BAPLIE, COPARN, CODECO, CUSCAR, CUSRES), XML and JSON with guaranteed delivery. TOS and ERP adapters are part of the product; the Customs Risk Management System and Maritime Single Window adapters will be developed for this project.

The proposed configuration (4 application servers, 2 database servers) was tested with 400 concurrent users and 180,000 messages per day at a 95th-percentile processing time of 4.1 seconds. Growth beyond this is handled by adding application servers (see the optional line in the financial proposal).

Availability: we commit to 99.5 % per calendar month for the portal and the messaging hub.

3. Security

- Internal users authenticate against the Authority's Active Directory over LDAPS with role-based access. External users and administrators use SMS one-time codes as a second factor.
- Passwords: 12 characters, lock after 5 failed attempts, 15-minute session lock.
- Audit logs for 5 years, forwarded to the SIEM by syslog in real time; log records are signed.
- AES-256 at rest, TLS 1.2 in transit with Authority PKI certificates.
- Critical vulnerabilities fixed within 14 days, high within 30 days.
- Independent penetration test before go-live; findings fixed before acceptance.
- Remote access only through the Authority VPN with per-session approval and recording.
- Daily encrypted backups to the secondary site; RPO 24 hours, RTO 12 hours.
- Staff vetting and confidentiality undertakings accepted. SBOM provided on request.

4. Implementation and support

Milestone	Month
Design sign-off	2
Portal, messaging hub and TOS integration live	9

SAMPLE · FICTIONAL

ERP and Maritime Single Window integration live	10
Customs Risk Management System integration live (after the customs interface specification is issued)	13
Vehicle booking system and Android haulier app live	12
iOS haulier app	18

Training for 30 Authority staff and onboarding sessions for 150 companies. The full user interface is available in Arabic (right-to-left) and English.

Support: 24/7 hotline. Severity 1: 2-hour response, 8-hour restoration. REST APIs are documented in OpenAPI 3 and a test environment is provided. Dashboards for dwell time and gate waiting times are standard; release lead-time reports will be configured during implementation.

SAMPLE · FICTIONAL

5. Compliance with RFP sections 3 and 4

Ref	Requirement	Response	Offered
3.1	Hosting in the Authority's data centres in the State; no public cloud dependency	Comply	Authority data centres, offline licences
3.2	Availability 99.8 % per calendar month (portal and messaging hub)	Partially comply	99.5 %
3.3	4,500 users, 600 concurrent, 250,000 messages/day, p95 < 5 s	Comply	Scalable by adding servers
3.4	MFA for all external users; Active Directory for internal users	Comply	SMS OTP; AD over LDAPS
3.5	Full Arabic and English UI incl. right-to-left	Comply	Arabic RTL and English
3.6	Open REST APIs (OpenAPI 3) with sandbox	Comply	OpenAPI 3, test environment
3.7	Dashboards: dwell time, gate waiting, release lead times	Comply	Dashboards and configured reports
3.8	Haulier mobile app (Android and iOS)	Partially comply	Android month 12, iOS month 18
3.9	Compliance with CITS-2026	Comply	See section 3
4.1	Go-live portal, hub, customs/TOS integrations ≤ 10 months; VBS ≤ 12 months	Partially comply	Customs integration month 13
4.2	Training 30 staff; onboarding ≥ 150 companies	Comply	30 staff, 150 companies
4.3	24/7 severity-1: 1 h response, 4 h restoration; 3 years support priced per year	Partially comply	2 h / 8 h
