REQUEST FOR PROPOSAL · GCD/T/2026/047

Electronic Seal (e-Seal) Tracking System for Transit Cargo

Port of Al-Noor, inland customs depots and land border posts

SAMPLE · FICTIONAL

Tender reference	**GCD/T/2026/047**
Procedure	Open tender · two envelopes (technical / commercial)
Date of issue	8 October 2026
Bid closing date	15 December 2026, 12:00 local time
Contact	Procurement Office · procurement@gcd.example

SAMPLE DOCUMENT. This tender, the issuing authority and the sites are fictional. The document was created to demonstrate procurement-evaluation software.

Requirements marked **MANDATORY** are mandatory: a bid that does not meet them may be rejected. **IMPORTANT** and **DESIRABLE** requirements are scored.

1. Background

1.1 About 420 transit movements leave the Port of Al-Noor every day for the 3 inland customs depots and the 2 land border posts. Goods in transit travel under customs control with mechanical seals, and high-risk loads are escorted by customs patrols.

1.2 The General Customs Directorate (the Directorate) seeks an electronic seal (e-seal) tracking system that follows every transit movement in real time from departure to arrival, so that escorts are only needed in exceptional cases.

2. Scope

2.1 Supply of 1,500 reusable GPS/GSM electronic seals, and charging stations for the 6 customs sites (the port, 3 inland depots and 2 border posts).

2.2 A monitoring platform for the Directorate's Transit Monitoring Centre, with a mobile app for customs officers.

2.3 Integration with the Directorate's Customs Declaration System (CDS).

2.4 A pilot, the full rollout, training, and 3 years of service including device maintenance and mobile data.

3. e-Seal requirements

3.1 Seals shall be reusable, certified to ISO 17712 as high-security (H) seals, and rated IP67. **MANDATORY**

3.2 Battery life of at least 30 days in normal operation (one position report every 5 minutes while moving), and a full recharge in less than 4 hours. **MANDATORY**

3.3 GNSS positioning and 4G mobile communication with 2G fallback. Seals shall store at least 10,000 events when out of coverage and send them automatically when coverage returns. **MANDATORY**

3.4 Any opening, cut or tampering attempt shall raise an alert at the Transit Monitoring Centre within 60 seconds. **MANDATORY**

3.5 Seals shall be armed and disarmed only by authorised customs officers using the officer mobile app; drivers and carriers shall not be able to arm or disarm a seal. **MANDATORY**

3.6 Operating temperature from −10 °C to +60 °C. **IMPORTANT**

4. Monitoring platform

4.1 A web application for the Transit Monitoring Centre with a live map, the 12 approved transit corridors as geofences, and alerts for route deviation, stops longer than 30 minutes, tampering, low battery and loss of signal. **MANDATORY**

4.2 Integration with the CDS through REST APIs: a trip is opened from the transit declaration when the seal is armed, and closed when the seal is disarmed at the office of destination. **MANDATORY**

SAMPLE · FICTIONAL

4.3 A mobile app for customs officers (Android), in Arabic and English, to arm and disarm seals, view trips and record inspections. IMPORTANT

4.4 Reports of transit times and alerts per corridor, seal utilisation and officer actions, exportable to Excel and PDF. IMPORTANT

4.5 The platform and all tracking data shall be hosted in the Directorate's data centre in the State, on virtual servers provided by the Directorate. The system shall comply with the Customs Transit Security Standard (CTS-2026). MANDATORY

4.6 Availability of the monitoring platform of at least 99.7 % per calendar month. IMPORTANT

5. Implementation and services

5.1 A pilot with 200 seals on 2 corridors within 3 months of contract signature, and the full rollout of all 1,500 seals on the 12 corridors within 6 months. MANDATORY

5.2 Training of 60 customs officers and 12 monitoring-centre operators, in Arabic and English. IMPORTANT

5.3 3 years of service from the full rollout: 24/7 support with a 2-hour response to platform outages, replacement of faulty seals within 5 working days, and a pool of spare seals of at least 5 % of the fleet. MANDATORY

5.4 Mobile data for all seals for the 3 years of service is part of the supplier's price. MANDATORY

6. Commercial conditions

6.1 Prices in USD, excluding VAT, fixed for the contract duration, with unit prices for seals and charging stations and a yearly service fee. MANDATORY

6.2 Payment: 25 % on acceptance of the pilot and 75 % on acceptance of the full rollout. The service fee is invoiced quarterly in arrears. IMPORTANT

6.3 Performance security of 10 % of the contract price, issued by a bank licensed in the State. MANDATORY

6.4 Bid validity of 90 days. Bid security of USD 30,000, issued by a bank licensed in the State. MANDATORY

7. Evaluation

7.1 Mandatory requirements are pass/fail. Compliant bids are scored 70 % technical (device performance 30, platform and integration 25, implementation plan 20, service 15, references 10) and 30 % financial.

7.2 Evaluated price = supply and installation + 3 years of service.

7.3 Bidders shall complete the compliance matrix in Annex 1.

SAMPLE · FICTIONAL

Annex 1. Compliance matrix (to be completed by the bidder)

For each clause, state Comply, Partially comply or Do not comply, and the section of the technical proposal where the requirement is answered.

Clause	Requirement	Response	Reference in the proposal
3.1	Reusable, ISO 17712 H, IP67		
3.2	Battery ≥ 30 days at 5-minute reporting; recharge < 4 h		
3.3	GNSS, 4G with 2G fallback; ≥ 10,000 events offline		
3.4	Tamper alert within 60 s		
3.5	Arm/disarm by officers only		
3.6	−10 °C to +60 °C		
4.1	Live map, 12 corridors, alerts		
4.2	CDS integration (REST)		
4.3	Officer app (Android), Arabic and English		
4.4	Reports, Excel and PDF export		
4.5	Hosted in the Directorate's data centre; CTS-2026		
4.6	Availability ≥ 99.7 %		
5.1	Pilot ≤ 3 months; full rollout ≤ 6 months		
5.2	Training: 60 officers, 12 operators		
5.3	3-year service: 2 h response, 5-day replacement, 5 % spare pool		
5.4	Mobile data included for 3 years
