Technical proposal (Envelope 1)

Tender GCD/T/2026/047 · Electronic Seal (e-Seal) Tracking System for Transit Cargo

To: The Chair, Tender Committee, General Customs Directorate

Having examined the tender documents for GCD/T/2026/047, we, Orbis Track GmbH, submit our technical proposal. This envelope contains no prices; our prices and commercial terms are in Envelope 2.

Markus Feld
Managing Director, Orbis Track GmbH

Date: 20 October 2026
Reference: OT-GCD-2026-047

SAMPLE · FICTIONAL

1. Company and references

Orbis Track provides cloud-based cargo tracking for logistics companies, insurers and customs administrations. Our Orbis eSeal One devices and the Orbis Cloud platform track more than 40,000 shipments a month in Europe and Africa.

Reference	Scope	Year
Northern European cargo insurers' pool	3,500 devices, cloud tracking	2022
West Coast customs transit corridor	800 e-seals, Orbis Cloud	2024
Baltic rail freight operator	1,200 devices	2025

2. The Orbis eSeal One

Orbis eSeal One is a reusable bolt-and-cable seal certified to ISO 17712 as a high-security (H) seal (certificate attached). It is rated IP67 and operates from −20 °C to +65 °C.

- **Battery:** 21 days with one position report every 5 minutes, and up to 60 days with one report every 15 minutes. Full recharge in 3 hours.
- **Positioning and communication:** GPS and Galileo; 4G LTE-M / NB-IoT with 2G fallback. 5,000 events are stored when out of coverage and sent on reconnection.
- **Tamper detection:** opening and cable cut. Alerts reach the platform typically within 2 minutes, depending on network conditions.
- **Arming and disarming:** seals are armed with the officer app. At destination, a seal can be disarmed with the officer app, or by the driver with a one-time code sent by SMS from the monitoring centre, which saves officer time at remote destinations.
- **Security:** AES-128 encryption on the device link; TLS 1.2 or higher for users and integrations.
- **Charging:** 6 charging stations with 20 slots each.

3. The Orbis Cloud platform

Orbis Cloud is a multi-tenant SaaS platform hosted in our data centres in Frankfurt (primary) and Amsterdam (backup), certified to ISO 27001. The Directorate receives a dedicated tenant, and its data is stored in the European Union under the GDPR. A read-only replica of the trip data can be installed on a server in the Directorate's data centre for reporting.

- Live map with corridors as geofences, and alerts for route deviation, stop time, tampering, battery level and loss of signal.
- CDS integration through REST and webhook APIs: trips open from the transit declaration and close when the seal is disarmed. The integration is delivered by our professional-services team.
- Officer app for Android and iOS in English, French and Portuguese; an Arabic interface is planned for Q3 2027.
- Standard dashboards with CSV export.
- Directorate users sign in with SAML single sign-on.

SAMPLE · FICTIONAL

- Arming, disarming and alert records are kept for 24 months.
- Availability: 99.9 % per calendar month (SLA).

4. Implementation, training and service

Milestone	Month
Tenant ready, corridors configured	1
Pilot: 200 seals on 2 corridors	2
Full rollout of 1,500 seals	5

Training. Our online academy (English) and a 3-day train-the-trainer course on site for the 12 monitoring-centre operators; customs officers are then trained by the Directorate's own trainers.

Service. 24/7 platform support from Hamburg, with a response within 4 hours to platform outages. Faulty seals are replaced within 10 working days from our Hamburg warehouse.

Mobile data. The seals use SIM cards provided by the Directorate, or Orbis global IoT SIMs charged at cost (see our commercial proposal).

5. Compliance matrix (Annex 1)

Clause	Requirement	Response	Offered
3.1	Reusable, ISO 17712 H, IP67	Comply	ISO 17712 H, IP67 (§2)
3.2	Battery ≥ 30 days at 5-minute reporting; recharge < 4 h	Partially comply	21 days at 5 min, 60 days at 15 min (§2)
3.3	GNSS, 4G with 2G fallback; ≥ 10,000 events offline	Comply	5,000 events (§2)
3.4	Tamper alert within 60 s	Comply	Typically within 2 minutes (§2)
3.5	Arm/disarm by officers only	Comply	Officer app; driver code at destination (§2)
3.6	−10 °C to +60 °C	Comply	−20 °C to +65 °C (§2)
4.1	Live map, 12 corridors, alerts	Comply	§3
4.2	CDS integration (REST)	Comply	§3
4.3	Officer app (Android), Arabic and English	Partially comply	Arabic planned Q3 2027 (§3)
4.4	Reports, Excel and PDF export	Comply	Dashboards, CSV (§3)
4.5	Hosted in the Directorate's data centre; CTS-2026	Partially comply	EU cloud; local read-only replica (§3)
4.6	Availability ≥ 99.7 %	Comply	99.9 % (§3)
5.1	Pilot ≤ 3 months; full rollout ≤ 6 months	Comply	Pilot month 2, rollout month 5 (§4)
5.2	Training: 60 officers, 12 operators	Comply	Train-the-trainer (§4)
5.3	3-year service: 2 h response, 5-day replacement, 5 % spare pool	Comply	24/7 support (§4)
5.4	Mobile data included for 3 years	Partially comply	Directorate SIMs or Orbis IoT SIMs (§4)
