Technical proposal (Envelope 1)

Tender GCD/T/2026/061 · Laboratory Information Management System (LIMS)

To: The Chair, Tender Committee, General Customs Directorate

Having examined the tender documents for GCD/T/2026/061, we, Qalamra Lab Systems W.L.L., submit our technical proposal. This envelope contains no prices; our prices and commercial terms are in Envelope 2.

Yousef Darwish
Chief Executive Officer, Qalamra Lab Systems W.L.L.

Date: 15 December 2026
Reference: QLS/GCD/061/26

SAMPLE · FICTIONAL

1. Company and references

Qalamra Lab Systems has built and supported laboratory software since 2011. Our 52 staff in Al-Noor develop QLIMS, which runs in 19 laboratories in the region, 11 of them accredited to ISO/IEC 17025.

Reference	Scope	Year
National Food Control Laboratory (ISO/IEC 17025)	QLIMS for 60 users, 22 instruments, certificates in Arabic and English	2020
Petroleum Products Testing Laboratory (ISO/IEC 17025)	QLIMS for 35 users, 16 instruments	2022
Port Health Laboratory (ISO/IEC 17025)	QLIMS for 28 users, integration with the port system	2024

2. Technical solution

QLIMS 7 covers the whole laboratory workflow:

- Sample reception with barcode labels and storage locations; the chain of custody records every hand-over from receipt to disposal.
- Test assignment by method, worklists per analyst and per instrument, and turnaround-time dashboards against the target of each test.
- Results entry with calculations, specification limits and automatic out-of-specification flags.
- Two-step review and approval (reviewer, then approver), each signed with the user's password; the signature is stored with the record.
- Certificates of analysis generated in Arabic and English from approved results.
- ISO/IEC 17025 module: method validation, measurement uncertainty, equipment calibration and maintenance, staff training and competence.

Instruments. 12 of the 14 instruments send their results to QLIMS through our instrument gateway (GC-MS, LC-MS, ICP-OES, FTIR and balances). The 2 Karl Fischer titrators have no supported interface: their results are entered by the analyst and checked by a second person.

CDS integration. Sample requests are imported from the CDS, and approved results are sent back, through a file exchange (SFTP) every night.

3. Security and data

Hosting. QLIMS is installed on the Directorate's servers in its data centre (application, database and file servers); no data leaves the Directorate.

- Every creation, change and deletion is recorded in an audit trail with user, time and reason; audit records cannot be edited and are kept for 10 years.
- Users sign in with their Active Directory accounts; roles separate reception, analysts, reviewers and approvers.
- Daily backups to the Directorate's backup system; we test a restore with the IT team every 6 months.

SAMPLE · FICTIONAL

4. Implementation and timeline

Milestone	Month
Workshops and configuration design	1–2
Installation, IQ and OQ	3–4
Instrument and CDS interfaces, data migration	4–6
PQ with the laboratory, validation report	7
Go-live	8

Validation. We perform IQ, OQ and PQ and deliver the validation plan, protocols and report before go-live.

Training. Courses in Arabic and English for the 45 users, and administrator training for 2 key users.

5. Support, warranty and SLA

Warranty. 12 months after go-live, covering the software and its configuration.

Support for 3 years. Service desk in Al-Noor on working days, with a response within 2 hours to critical faults and on-site help when needed. Updates and new versions are included.

SAMPLE — FICTIONAL

Annex A. Compliance matrix (Annex 1 of the RFP)

Clause	Requirement	Response	Offered
2.1	45 named users	Comply	§2
2.2	14 instrument interfaces	Partially comply	12 of 14 interfaced (§2)
2.3	CDS integration	Comply	§2
2.4	Implementation, migration, validation, training, support	Comply	§4
3.1	Sample reception, barcodes, chain of custody	Comply	§2
3.2	Worklists, turnaround-time tracking	Comply	§2
3.3	Calculations, limits, OOS flags	Comply	§2
3.4	Two-step approval with e-signatures	Comply	§2
3.5	Certificates in Arabic and English	Comply	§2
3.6	ISO/IEC 17025 records	Comply	§2
4.1	Hosted in the Directorate's data centre	Comply	§3
4.2	Audit trail, kept 10 years	Comply	§3
4.3	Active Directory, separate roles	Comply	§3
4.4	Direct instrument result transfer	Partially comply	Karl Fischer entered manually (§2)
4.5	CDS REST integration, real time	Partially comply	Nightly file exchange (§2)
4.6	Daily backups, restore test every 6 months	Comply	§3
5.1	Go-live ≤ 9 months	Comply	Go-live month 8 (§4)
5.2	IQ/OQ/PQ by the supplier	Comply	§4
5.3	Training: 45 users, 3 administrators	Comply	45 users, 2 administrators (§4)
5.4	3-year support, 4 h response	Comply	2 h response (§5)
5.5	Warranty ≥ 12 months	Comply	12 months (§5)
6.1	≥ 3 accredited-lab implementations	Comply	§1
6.2	Office or partner in the State	Comply	Office in Al-Noor (§1)
